

## 2K-UniCan

If anyone CAN - we CAN!

# 2K-UniCan

2K containers are designed to store two-component systems (e.g. resin and hardener) separately. The components are only combined immediately before application. Typical uses include paints and varnishes, adhesives and other chemical technical products that must be mixed at the point of use.

The product features of 2K-UniCan „made by Pirlo“ at a glance:

- Dangerous goods certificates for A and B component
- Special lid geometry of the lower container connects two metal packaging elements
- A component: Conical bucket with nominal volumes of 6 to 12 litres
- B component: Cylindrical bucket with nominal volumes of 2,5 to 6 litres
- Individual containers and combinations stackable
- Customised printing and embossing (lid) possible

## 2K-UniCan with cranked handle:

- B-component pail (153/166 mm) with cranked handle for independent residual emptying
- B-component pail (183/195 mm) with cranked handle for independent residual emptying

If you have any questions about 2K-UniCan our experts will be happy to help. Special can sizes are possible on request.

Unrestricted suitability for all filling goods cannot be guaranteed; this must be verified by the user through their own preliminary tests. The stated application groups serve solely as a legally based guideline.

Standard sizes				
A-component				
Nominal capacity in l	Dimension D1 / D2 / in mm	Height H1 in mm	Quantity per pallet	Hazardous goods certification
6	230/217	175	330	UN/RID ADR
7	230/217	208	330	UN/RID ADR
10	230/217	291	330	UN/RID ADR
11	230/217	325	330	UN/RID ADR
12	230/217	345	240	UN/RID ADR
B-component				
Nominal capacity in l	Dimension D3 / D4 / in mm	Height H2 in mm	Quantity per pallet	Hazardous goods certification
2,5	230/225	80	330	UN
4	230/225	125	330	UN
